

# Springhill Farm

Holiday Accommodation

## **Springhill Farm Holiday Accommodation Visitor Charter**

We love where we are and the environment around us. Looking after the environment around us means a lot to us here at Springhill Accommodation and we ask everyone enjoying our park to help us conserve the environment around us by following our suggestions below... We'd love to hear about your suggestions and tips for protecting our environment! Share them with us and you could win Springhill Accommodation Vouchers!

### **Use less & use again**

Try and buy just what you need for your holiday. You can always buy in more at our handy on site shop. Plus you'll save £££ too, instead of throwing food away. Dig out those bags for life and use them again and reuse plastic bags as bin bags, for packed lunches or carrying wet swimming clothes.

### **Recycle**

Use our recycling skip for all your plastics, glass, aluminum, paper and wood products. Don't worry about separating them, as our special waste company will do that for you!

### **Give your car a holiday**

Explore Northumberland by foot, hire a bike locally or hop aboard the bus. Just ask a member of staff about timetables. Bike helmets are available to hire too!

### **Keep it local**

We love supporting our friendly local businesses. There are so many great places to eat, shop and visit nearby. Browse our tourist information area in our reception or ask a member of staff for their tips and suggestions on what to do and where to go! Discounts are available for our guests at attractions including Bamburgh Castle and Alnwick Castle.

### **Love our natural surroundings**

The countryside and beaches around us are amazing and so is the wildlife that makes its home there. Help us protect our natural surroundings by taking your litter home with you, using footpaths and cycle ways responsibly and guarding against fire.

### **Be an eco hero!**

We already use energy efficient light bulbs and have double glazing and super insulated caravans to help reduce energy wastage and to keep your accommodation toasty warm. Being an eco hero starts with simple ways in

which you can join us to save energy. Switch lights off when not in use. Close windows when you have your heating on. Remember to turn off your heating if you leave your caravan. Unplug chargers for electronic devices and turn the TV off rather than leaving it on standby. Save water by turning off taps when brushing your teeth or when you're doing the washing up.
